

Vezir Abi ile Satranç Öğreniyorum - Atın Serüveni

Merhaba Arkadaşlar
Bu kitapçıkta satranç oyununda
atın nasıl hareket ettiğini öğrene-
ceğiz. Ardında birbirinden keyifli
bulmacaları çözüp atın serüvenine
ortak olacağız. Hadi gelin atın
hareketinden başlayalım.

At her yöne doğru 2 düz
1 yan gider. L şeklinde de diyebiliriz.

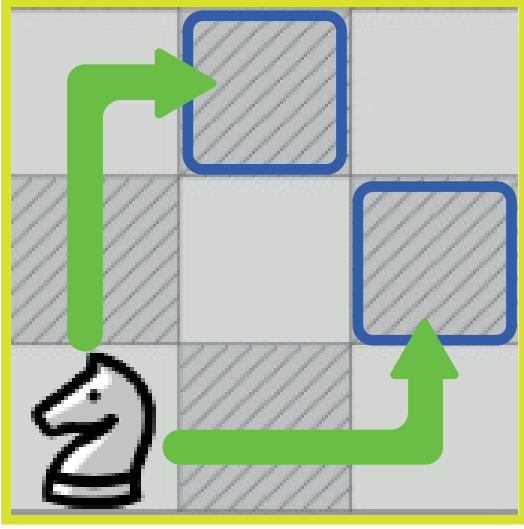

İlk konumdaki atımız yeşil işaretli karelerin hepsine gidebilir

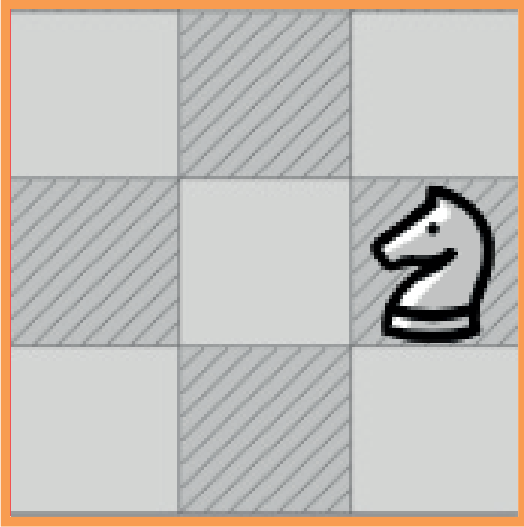

Diğer taşların üzerinden atlayabilir ve gideceği
karedeki rakip taşı alabilir

At başlangıçta en çok karıştırılan taştır. 2 düz bir yan - 1 düz 1 çapraz ya da L hepsi aynı yere gider!

Atın 1 hamlede
gidebileceği kareleri benim gibi
gösterebilir misin?

Vezir Abi ile Satranç Öğreniyorum - Atın Serüveni

Satranç oynarken artık daha ileriye görmeye başlayabiliriz. Bir kaç hamle ileriye görerek iyi bir satranç oyuncusu olma yolunda bir adım daha atalım! Tek yapmamız gereken oklar çizerek yıldızları toplamada ata yardımcı olmak!

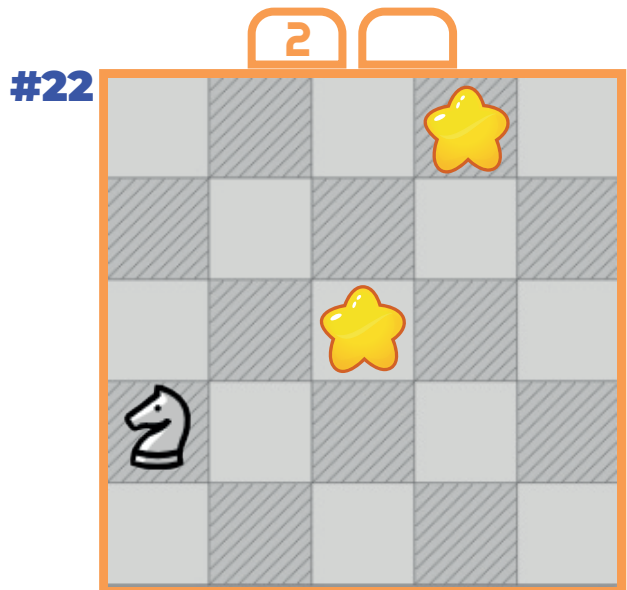

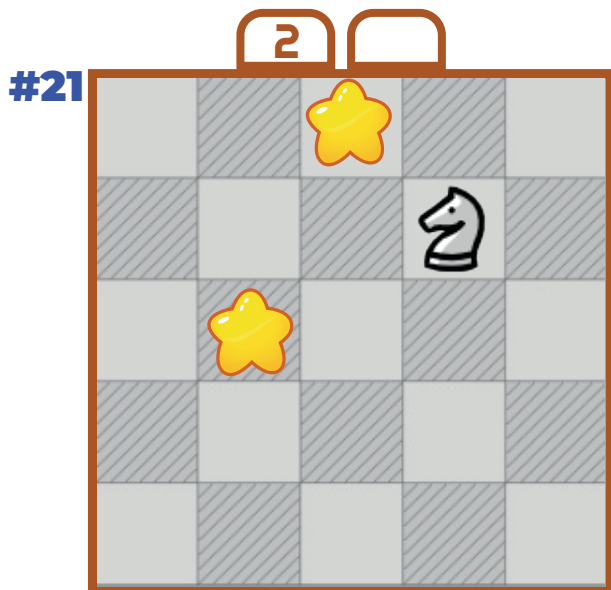

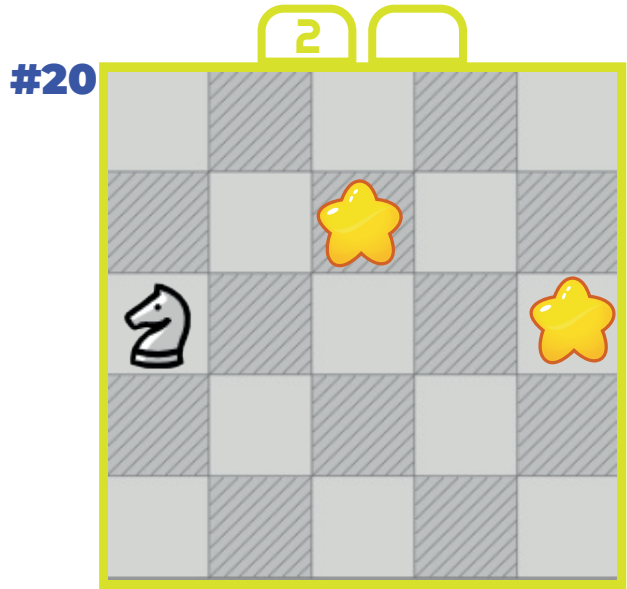

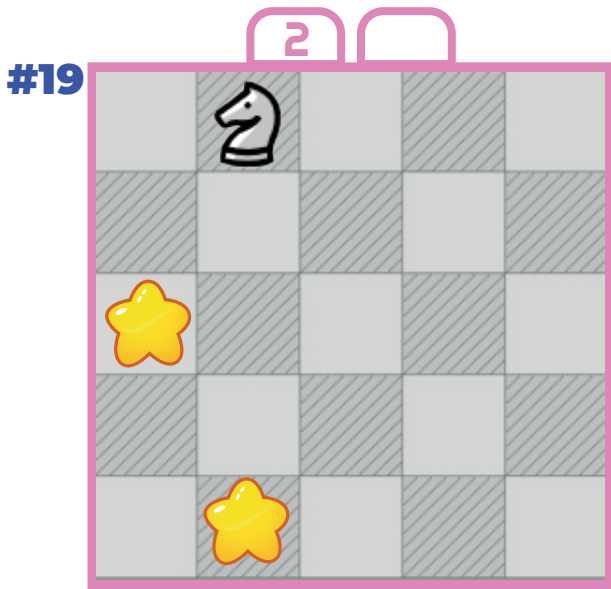

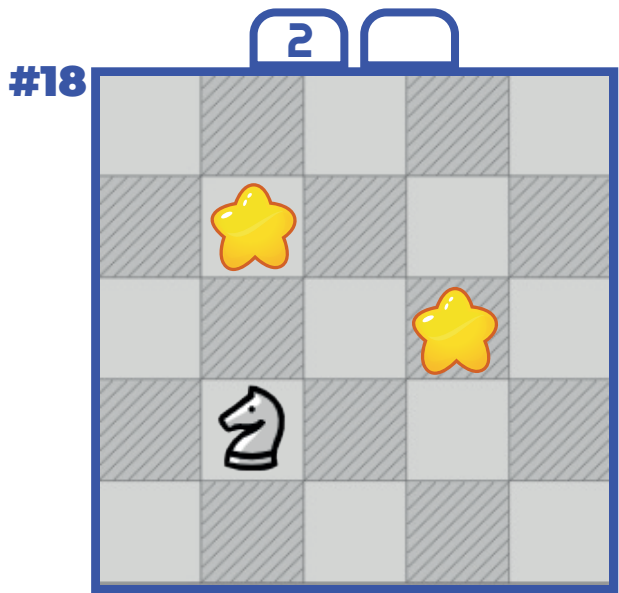

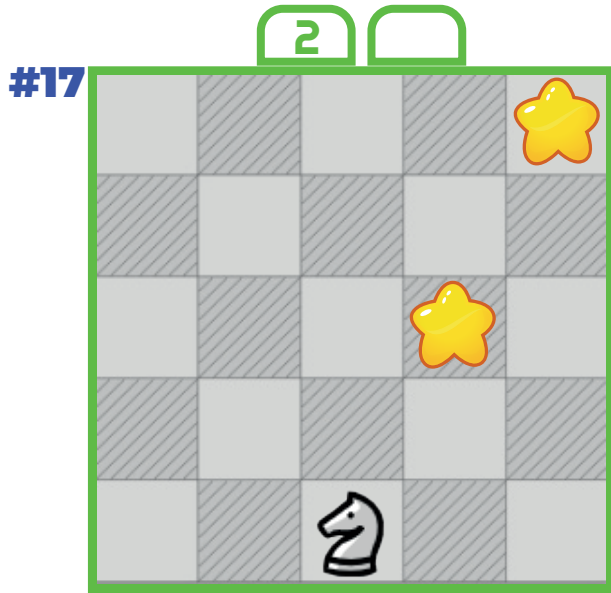

Burada tüm yıldızları kaç hamlede toplana gerektiği yazıyor

Öğretmenimiz ya da bir büyüğümüz buraya doğru işareti koyabilir

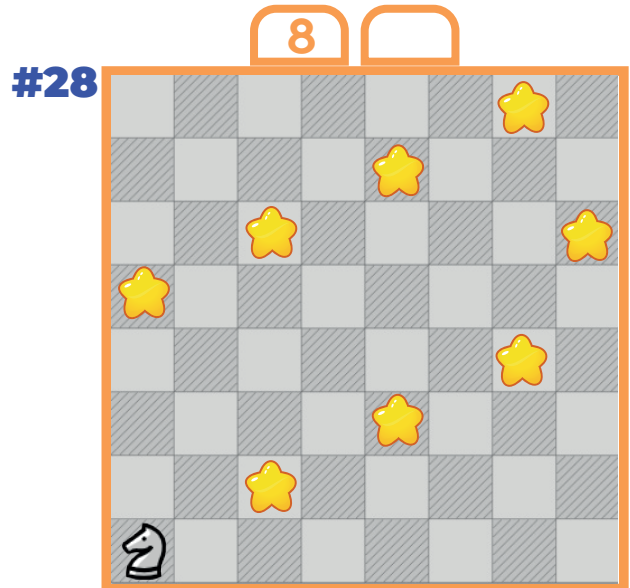

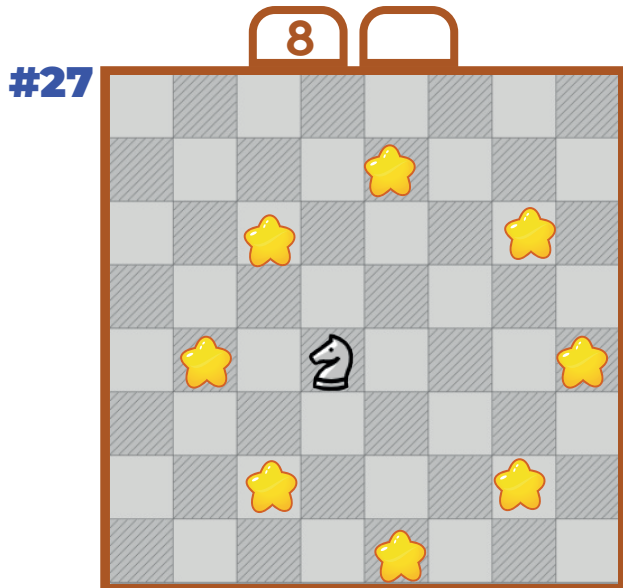

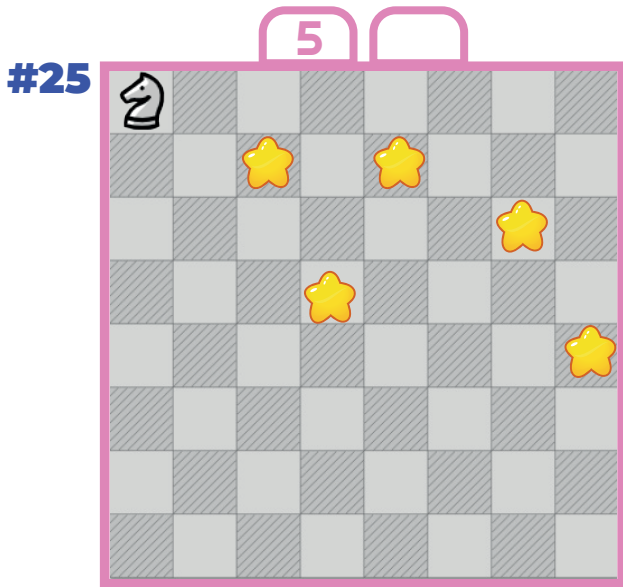

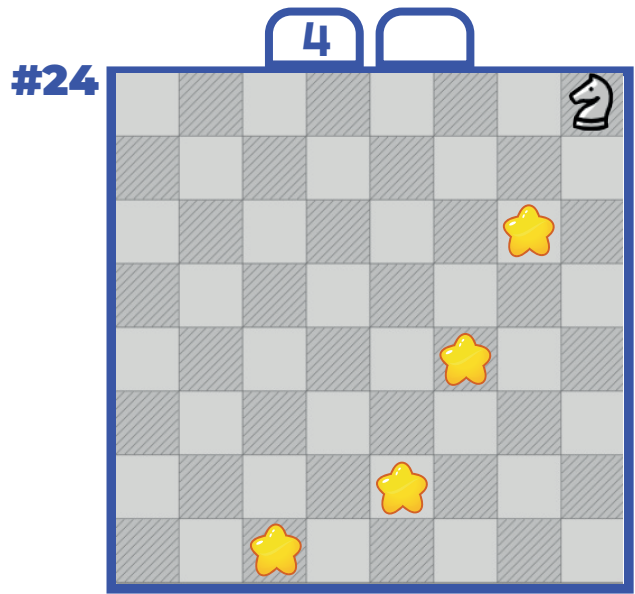

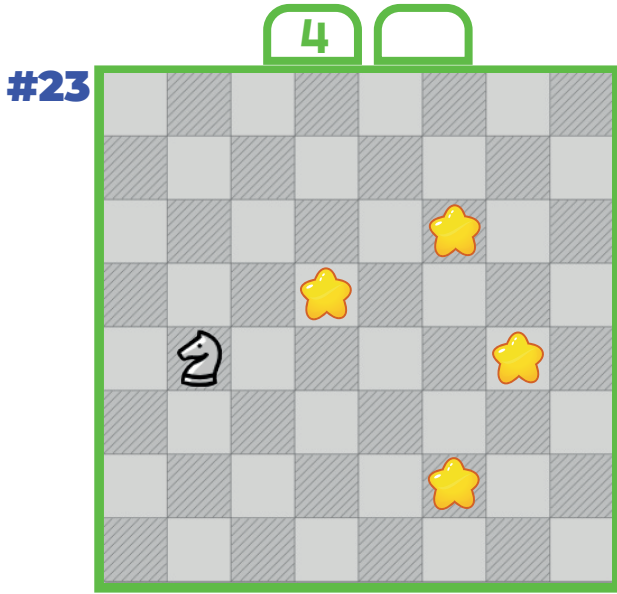

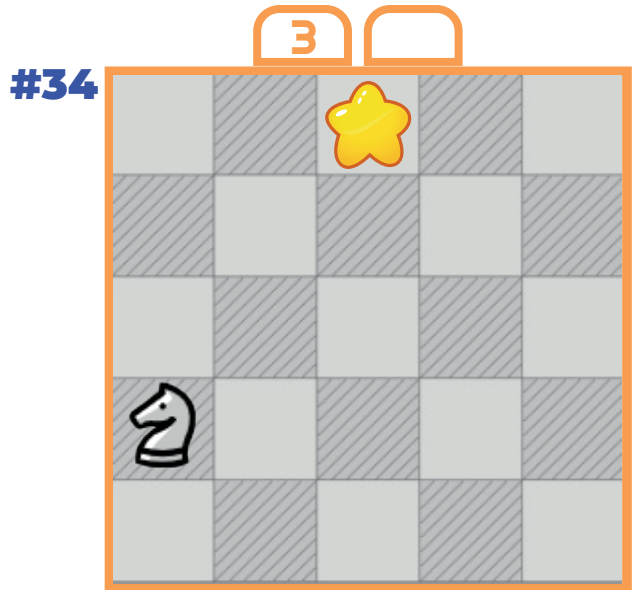

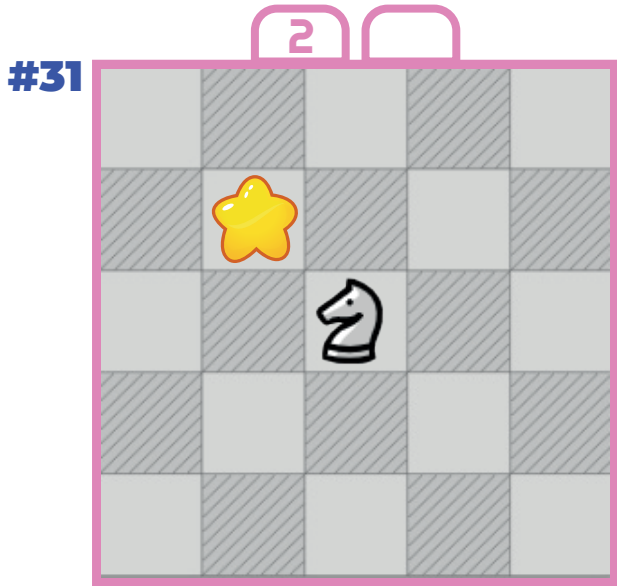

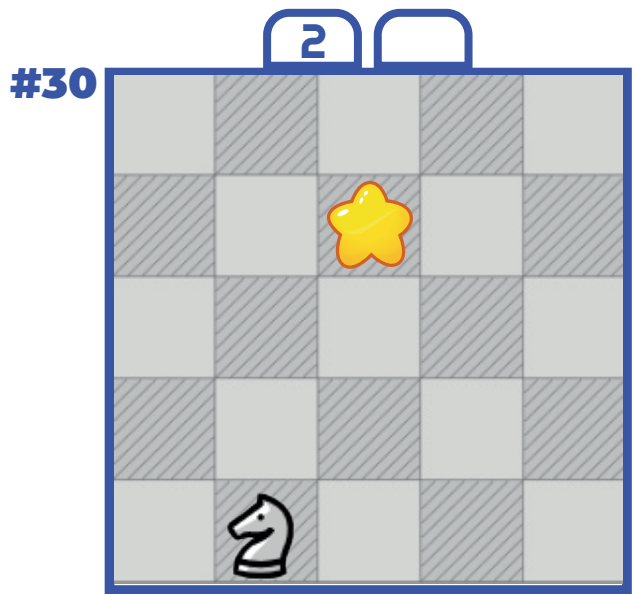

Bulmacaları gerçek satranç tahtasında yıldızların yerine piyon koyarak da çözebilirsin!

Buraya kadar harikaydın!
Şimdi işleri biraz daha keyifli hale
getirelim.
Satranç oyununu oynarken rakibimizin
bizim taşlarımıza tuzak kurduğu
kareler olabilir.
Bundan sonraki bulmacaları bu
karelere basmadan yapalım!

Satrançta rakibimize saygı göstererek oynamalıyız!

Vezir Abi ile Satranç Öğreniyorum - Atın Serüveni

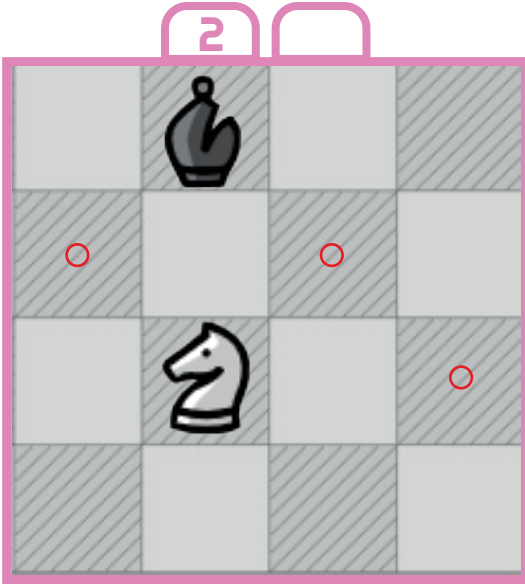

Yıldızları toplamak oldukça keyifliydi. Şimdi sıra rakip taşları toplamada. Fakat bir sorunumuz var rakip taşlar da bizim atımızı ele geçirmeye çalışıyor onların erişebileceği kırmızı karelere basmadan toplamaya çalışmalısın. Rakip bir taşı aldığında o taşın tehdit ettiği karelere de gelebilme şansın var.

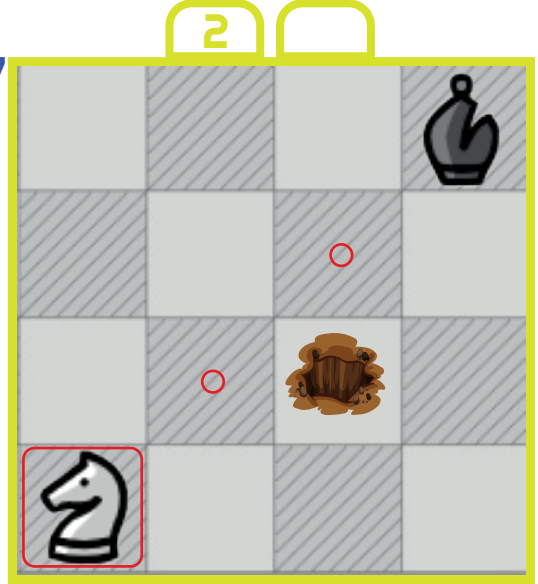

Çaptazların Efendisi Filleri
toplayarak başlayalım

Bol bol pratik yapmak bizi daha iyi bir satranç oyuncusu yapar!

Kitabımızın sonuna geldik sen de süper atın da harika bir kupayı hak ettiniz. Kitabımızı Ustalığına yakışır bir bulmacayla bitirelim.
Beyaz at ile hazine sandığına 8 hamlede ulaşabilir misin?

Atın gideceği yerleri oklarla çizmek yerine gittiği adımları 1-2-3 diye yazabilirsin!
